The Complete Platform Lift Solution

Experience

Evo Lifts are specialist suppliers of a full range of access lifts. With an unrivalled level of expertise and service, we can help you meet the Disability Discrimination Act and Part M building regulations.

Our commitment to excellence runs throughout our operation - from your first point of contact with us to installation and beyond.

Customer Service

At Evo Lifts we have been setting new standards in the supply, installation and maintenance of platform lifts by offering unrivalled customer service. This leadership has been achieved through our decision to specialise in access lifts. The quality of the lifts is complemented by a commitment to customer service that ensures the best possible specification, installation and ongoing service for our clients.

Innovation

Evo Lifts constantly review products, processes and procedures to ensure we deliver the best possible service to our customers. Our platform lifts meet all British and European Standards and are tested in accordance with the European Directives and CE marked.

Earls Court Ideal Homes Exhibition organisers chose an adjacent 2-stop lift to provide disabled access to the showcase Eco Home.

www.evoulifts.co.uk

Our platform lifts are installed in a wide range of environments:

- High Street Retail Outlets
- Shopping Centres
- Corporate Offices
- Hotels
- Entertainment Complexes
- Council Offices
- Government Facilities
- Libraries
- Educational Establishments
- Ships
- Airports
- Museums
- Galleries
- Private Homes

EVO 500 Internal Platform Lift

The EVO 500 multi-stop Platform Lift offers unrivalled performance up to 12 metres for internal applications. With little disruption to existing buildings and minimal builders work for new build projects along with its ease of use to the end user makes this lift the ideal choice. For changes in level up to 2m with a half height enclosure or a multi stop unit with up to 12m of travel, alternative sizes and options offer unrivalled flexibility.

Benefits

- Flexible with a maximum travel distance of 12m
- Configurations up to 6 stops
- Entrances and exits available to 3 sides
- Reliable and engineered to precision standards
- Economical and self-contained, requiring no separate shaft or external machine room
- Virtually no building work, the EVO 500 is an economical and easy to install solution
- Overall low maintenance and running costs
- Range of 6 platform sizes

Standard features

- Screw and nut mechanism for fast, quiet travel
- Soft start
- Illuminated tactile control buttons
- Floor indicator and voice announcer on multi-stop installations
- Arrival gong
- Alarm
- Sensitive edges to platform
- Emergency light on platform
- Emergency lowering
- Shaft ceiling and light
- Extensive list of options to meet individual requirements

EVO 400 External Platform Lift

The EVO 400 Platform Lift is a robust and reliable lift which has been specifically designed for outdoor use. With a wide variety of safety features and finishes available, the EVO 400 works seamlessly with the flow of any building without compromising on performance. No machine room is needed and there is usually little construction work required, so installation is quick and easy too.

Benefits

- Robust and manufactured to withstand climatic changes
- IP rated electrical circuits for reliability
- Entrances and exits available to 3 sides
- Overall low maintenance and running costs
- Flexible with a maximum travel distance of 12 metres
- Configurations of up to 6 stops
- Range of 6 platform sizes

Standard features

- Weatherproof shaft including roof
- Shaft ceiling light
- Soft start
- Anti-corrosive finishes
- Illuminated tactile control buttons
- Arrival gong
- Floor indicator and voice announcer on multi-stop installations
- Sensitive edges to platform
- Alarm
- Emergency light on platform
- Emergency lowering
- Extensive list of options to meet individual requirements

EVO 300

Step Lift

The EVO 300 Step Lift provides a simple solution for changes in level. The EVO 300 can accommodate a rise of up to 1m for internal or external applications with little or no alteration to the existing building. Special finishes include brushed stainless steel handrails and glass upper gate. As an additional option Bi-parting platform gates can be supplied. The EVO 300 can be provided in two platform sizes.

Benefits

- Simple to use
- Operation is simple with all electrical components integral within the unit
- Discreet with a small footprint and a variety of finishes and colours
- No recess required
- 1 day installation with minimal building work
- Overall low maintenance and running costs

Standard features

- 5 year anti-corrosion manufacturers warranty
- Free standing
- Self-closing ramp and upper gate
- Slip-resistant platform surface
- Low level lighting
- Emergency stop button
- RAL 9003 powder coated steel panels with colour options
- Extensive list of options to meet individual requirements

EVO 200

Inclined Platform Lift

The EVO 200 Inclined Platform Lift provides a flexible, discreet and economical solution to meet a wide variety of access requirements. Easy to install, our EVO 200 Inclined Platform Lift can be used on virtually any staircase because it has been designed to negotiate straight, curved or spiral staircases, turn corners and traverse half-landings smoothly and safely.

Benefits

- Adaptable with single and multi-flight capability
- A variety of platform sizes and a multitude of applications
- Able to meet many access requirements both internal and external
- Discreet foldaway platform when parked
- Fits seamlessly into any building with minimal impact on staircase usage
- Cost-effective, requiring minimal building work
- Wall or stanchion-mounted rail system following the course of your existing or specified staircase
- Overall low maintenance and running costs

Standard features

- Slip-resistant platform surface
- Tactile controls on platform for ease of use
- Soft start/stop operation
- Power folding platform and barrier arms
- Motorised brake and overspeed governor
- Automatic safety stop if travel obstructed
- Extensive list of options to meet individual requirements

EVO 100 Home Lift

The EVO 100 home lift provides a cost-effective and discreet solution for those requiring greater freedom of movement within their own homes. Designed with a small footprint the EVO 100 takes up little space yet travels up to 12 metres and 4 stops.

Benefits

- Flexible with a maximum travel distance of 12m
- Configurations up to 4 stops
- Entrances and exits available to 3 sides
- Reliable and engineered to precision standards
- Economical and self-contained, requiring no separate shaft or external machine room
- Virtually no building work, the EVO 100 is an economical and easy to install solution
- Overall low maintenance and running costs

Standard features

- Screw and nut mechanism for fast, quiet travel
- Soft start
- Self-closing doors
- Sensitive edges to platform
- Emergency light on platform
- Integral ceiling light
- Emergency battery powered lowering
- Emergency stop button
- Slip-resistant flooring
- RAL 9003 white powder coated steel panels
- Extensive list of options to meet individual requirements
