

## EVO200 Platform Stairlift Epsom Downs Primary School Surrey

### Client

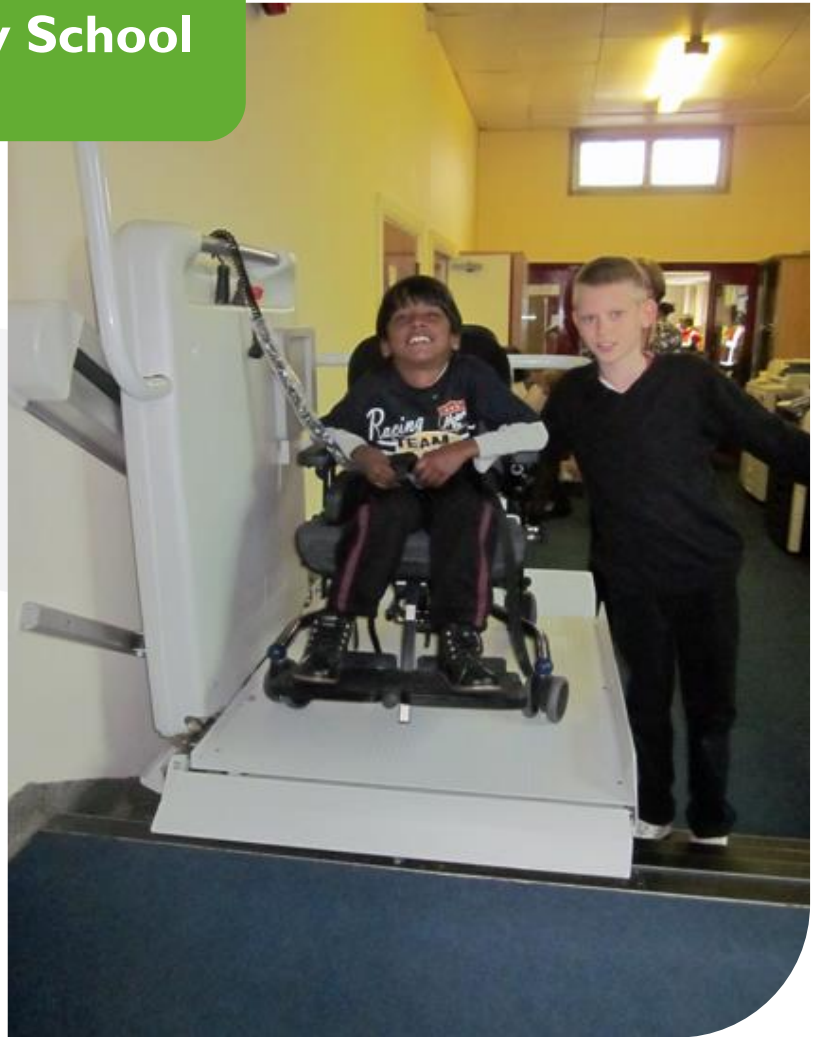

Epsom Downs Primary School is a thriving, inspirational environment for over 350 children aged from three months to eleven years. However, there was one major hurdle for physically impaired students: the premises comprise two buildings, requiring the use of five steps to move between them.

### Problem

Working in partnership with the Physical & Sensory Support Service (PSS), Diane Welch, Special Needs Co-ordinator, specified a platform lift which would enable physically impaired students, staff and visitors to navigate between the buildings more comfortably. The PSS recommended Evolifts who, following an initial site visit, supplied and installed an [EVO200](#) Inclined Platform Stairlift.

### Solution

Designed to be used on virtually any staircase, the [EVO200](#) Platform Stairlift is a high quality, safe and economical solution for a wide variety of situations. It's discreet too, as the platform folds away neatly when not in use – important in this situation so as not to impede other students' mobility.

### Testimonial

Diane Welch commented "Evolifts were absolutely brilliant and I would recommend them to anyone. I started the process at the beginning of February 2011 and the project was complete one month later."
